

National Forum Mid-Year Meeting Chat Transcript

Hilly Paige:

00:52:35: Looking forward to another great National Forum mid-year convening! Family Heart Foundation is excited to join.

Laura King:

00:54:26: Laura King, American Heart Association - Looking forward to another excellent mid-year National Forum meeting.

Julie Harvill:

01:23:31: The entire event is being recorded and transcribed. In the coming weeks, a link to this information, including slides, will be sent to all registrants.

01:46:20: [Link to program book](#) - agenda, Haiku, resources, speaker photos, and bios:

01:54:26: [Move with the Mayor® \(MWTM\)](#)

Lezlie Mestdagh:

01:51:35: [Here](#) is a link to patient education from the American College of Cardiology's CardioSmart:

01:52:37: And the one on [Move More](#)

Margaret Guerin-Calvert:

01:41:57: And we'd note as in the example we used that a collaborative or a region can use the BIM to estimate the overall impact of hypertension on their entire community and its major populations.

01:42:16: It can align a private-public partnership together around a local community or region.

Kyi-Sin Than:

01:24:14: The Budget Impact Model and the Claims Analysis Guide are available for download [here](#)

01:38:29: [Common Ground Health - The High Blood Pressure Collaborative](#)

Bridget Hallman, MPA, CWP:

01:37:10: [Link](#) to the Rochester, NY example

John Clymer:

02:28:23: [Here](#) is the document shared by Judy Hannan that shows how through billing to Medicare one can likely recoup costs for an HTN control program

Gregory Wozniak:

02:36:54: [Here](#) is a link to an SMBP ROI paper

Kayla Flores Tindall:

03:23:10: I am a family medicine doctor at Kaiser Permanente. One of the key things that empower us to be proactive about blood pressure control is having a BP dashboard for panel management or population health work, with regular feedback on quality indicators. This tool is essential for moving the needle and closing equity gaps.

Judy Hannan:

03:08:25: The Million Hearts initiative has updated its focus for 2027. See the updated framework [here](#).

03:23:10: Policy support is needed. Consider how many lives (and minds) could be saved if preventing and controlling hypertension was appropriately supported.

Stephen Sidney:

03:05:07: Hypertensive heart disease is the second leading cause of mortality (underlying cause) after coronary heart disease in the United States, over 88,000 deaths per year.

03:19:01: Clarification: Hypertensive heart disease is the second leading cause of heart disease mortality (not all mortality). It would be in the top 10 leading causes of mortality in the United States if separated out from heart disease.

Jen Childress:

02:20:58: For more information on Move with the Mayor and how to get involved, please visit: [Move with the Mayor](#)
